A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.35(a). In no event, however, may a reply be timely filled at the state of the complex of the c			
THE MAILING DATE OF THIS COMMUNICATION. Estendance of time may be autiable under the provisions of 3 CFR 1.136(a). In no event, however, may a reply be limely filed after SX (6) MONTHS from the mailing date of this communication. If the period for reply specific dators is less than thin (20) days, a reply within the statutory minimum of thirty (30) days will be considered timely. Failure to reply verifies the mailing date of this communication. Failure to reply verifies the status of the provision of the communication of the communication of the communication of the provision of the communication of the communication. See 37 CFR 1.794(b). Status 1) Responsive to communication(s) filed on 10 January 2005. 2a) This action is FINAL. 2b) This action is FINAL. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1-38 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) is/are allowed. 6) Claim(s) is/are objected to by the Examiner. 7) Claim(s) is/are objected to Dy the Examiner. Application Papers 9) The specification is objected to by the Examiner. Application Papers 9) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner. Application Papers 9) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 10) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list o		appears on the cover sheet w	ith the correspondence address
Status 1 Responsive to communication(s) filed on 10 January 2005. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.	THE MAILING DATE OF THIS COMMUNICATIO - Extensions of time may be available under the provisions of 37 CFF after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a - If NO period for reply is specified above, the maximum statutory per - Failure to reply within the set or extended period for reply will, by standard properties of the maximum statutory per - Any reply received by the Office later than three months after the maximum status.	N. R. 1.136(a). In no event, however, may a reply within the statutory minimum of thi riod will apply and will expire SIX (6) MOI atute, cause the application to become A	reply be timely filed ny (30) days will be considered timely. NTHS from the mailing date of this communication BANDONED (35 U.S.C. § 133).
2a) ☐ This action is FINAL. 2b ☐ This action is non-final. 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) ☐ Claim(s)	, ,		
2a) ☐ This action is FINAL. 2b ☐ This action is non-final. 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) ☐ Claim(s)	1) Responsive to communication(s) filed on 1	0 January 2005.	
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1-38 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) is/are objected to. 8) Claim(s) is/are objected to by the Examiner. Application Papers 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(c 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. Attachment(s) 1) Notice of References Cited (PTO-892) 2) Information Disclosure Statement(s) (PTO-1449 or PTO/SB08) 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB08) 5) Notice of Informal Patent Application (PTO-152)	<u> </u>	•

DETAILED ACTION

 This action is responsive to the Amendment filed on January 10th 2005. Claims 5, and 11 have been amended. Claims 1-38 are presented for examination.

Response to Amendment

- 2. In view of the amendment of specification to include double-spacing, objection to the specification is hereby withdrawn.
- 3. In view of the amendment of claim 5 to include a consistent terminology set forth in claim 3 ("data storage unit"), objection of claim 5 is hereby withdrawn.
- 4. In view of the amendment of claim 11 to correct the typographical error "sadi", objection of claim 11 is hereby withdrawn.
- 5. The affidavit/declaration filed on January 10th 2005 under 37 CFR 1.131 has been considered but is ineffective to overcome the Rosen (US 2003/0048473) reference.

The Rosen reference is a U.S. patent or U.S. patent application publication of a pending or patented application that claims the rejected invention. An affidavit or declaration is inappropriate under 37 CFR 1.131(a) when the reference is claiming the same patentable invention, see MPEP § 2306. If the reference and this application are not commonly owned, the reference can only be overcome by establishing priority of invention through interference proceedings. See MPEP Chapter 2300 for information on initiating interference proceedings. If the reference and this application are commonly owned, the reference may be disqualified as prior art by an affidavit or declaration under 37 CFR 1.130. See MPEP § 718.

The evidence (i.e., Exhibit 1) submitted is insufficient to establish a conception of the invention prior to the effective date of the Rosen reference. While conception is the mental part of the inventive act, it must be capable of proof, such as by demonstrative evidence or by a

Art Unit: 2192

complete disclosure to another. Conception is more than a vague idea of how to solve a problem. The requisite means themselves and their interaction must also be comprehended. See *Mergenthaler v. Scudder*, 1897 C.D. 724, 81 O.G. 1417 (D.C. Cir. 1897).

In view of the foregoing discussion, claim rejections under U.S.C §102(e) and U.S.C §103(a) established in the Office Action dated July 15th 2004 are considered proper and maintained.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 7. Claims 16-17, 19, 35-36, and 38 are rejected under 35 U.S.C. 102(e) as being anticipated by Rosen (US 2003/0048473), hereinafter *Rosen*.

As per claim 16, *Rosen* teaches a method of providing device software to a client machine of a network, comprising the steps of:

storing the device software on at least one network peripheral device (e.g., see
Abstract, Fig.1 printer driver 114 & memory 112 & associated text, Fig.4 printer 402,
404 & associated text) disposed in communication (e.g., Fig.4 & associated text, par.
[0029] line 8-10, Fig.2 & associated text, par. [0032] line 9-11) on the network (e.g.,
Fig.4 network 406 & associated text);

Application/Control Number: 09/970,134

Art Unit: 2192

communicating data representative of a presence of the device software (e.g., FIG.4A 74 & 76, FIG.4B 78, col.1 : 18-20 & 47-52, col.3 : 10-13) to the client machine (e.g., Fig.4 computer 408 & associated text) of an end-user (e.g., par. [0009] line 4-5);

Page 4

- establishing data communication between said at least one network peripheral
 device and the client machine in accordance with a prompt generated by the client
 machine (e.g., par. [0011] line 1-4); and
- o downloading the device software from said at least one network peripheral device to said client machine in accordance with said prompt (e.g., par. [0038] line 9-11).

As per claim 17, *Rosen* teaches the method of claim 16, wherein the step of communicating occurs in response to said end-user sending a print request to said at least one network peripheral device which is a network printer (e.g., par. [0038] line 1-3).

As per claim 19, *Rosen* teaches the method of claim 16, further comprising the step of uploading the device software to said at least one network peripheral device by an administrative user so that said end-user can download selected ones of components of the device software in the step of downloading (e.g., par. [0038] line 11-14, Fig.5 & associated text, par. [0040] line 1-11).

As per claim 35, *Rosen* teaches an apparatus for providing peripheral software to a client machine of a network, comprising the steps of:

at least one network peripheral disposed in communication (e.g., Fig.4 & associated text, par. [0029] line 8-10, Fig.2 & associated text, par. [0032] line 9-11) on the network (e.g., Fig.4 network 406 & associated text), said at least one network peripheral having a storage unit for storing the peripheral software device (e.g., see

Application/Control Number: 09/970,134 Page 5

Art Unit: 2192

Abstract, Fig.1 printer driver 114 & memory 112 & associated text, Fig.4 printer 402, 404 & associated text);

- wherein data is communicated from said at least one network peripheral to the client machine (e.g., Fig.4 computer 408 & associated text) of an end-user (e.g., par. [0009] line 4-5) that is representative of a presence of the peripheral software (e.g., FIG.4A 74 & 76, FIG.4B 78, col.1 : 18-20 & 47-52, col.3 : 10-13);
- wherein data communication is established between said at least one network
 peripheral and the client machine in accordance with a prompt generated by the
 client machine (e.g., par. [0011] line 1-4);
- wherein the peripheral software is downloaded from said at least one network peripheral to said client machine in accordance with said prompt (e.g., par. [0038] line 9-11).

As per claims 36 and 38, they recite limitations which have been addressed in claims 17 & 19 respectively, therefore, are rejected for the same reasons as cited in claims 17 & 19.

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 1-15, 18, 20-34, and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosen as applied to claims 16-17, 19, 35-36, and 38 above, in further view of Slivka et al. (US 6,256,668), hereinafter Slivka et al.

As per claim 1, *Rosen* teaches a method of providing device software from a network, comprising the steps of:

- o providing communications (e.g., Fig.4 & associated text, par. [0029] line 8-10, Fig.2 & associated text, par. [0032] line 9-11) via the network (e.g., Fig.4 network 406 & associated text) between a client machine (e.g., Fig.4 computer 408 & associated text) disposed on the network and at least one network peripheral device (e.g., see Abstract, Fig.1 printer driver 114 & memory 112 & associated text, Fig.4 printer 402, 404 & associated text), said client machine associated with an end-user (e.g., par. [0009] line 4-5);
- o notifying the client machine of the availability of the device software (e.g., FIG.4A 74 & 76, FIG.4B 78, col.1 : 18-20 & 47-52, col.3 : 10-13) in response to a connection request to said at least one network peripheral device (e.g., par. [0011] line 1-4);
- o downloading said selected components of the device software from said at least one network peripheral device to the client machine (e.g., par. [0038] line 9-11).

Rosen fails to teach the manual selection of one or more components of the device software for download by the end-user. Slivka et al. teach a method of providing device software (e.g., col.1 line 31-33) to client machine (e.g., FIG.2 user computer 34 & associated text) from a network (e.g., FIG.2 36, server 46 & associated text) comprising the step of manually selecting (by end-user) for download one or more components of the device software (e.g., col.5 : 55-65, FIG.4B 86 & associated text, col.8 : 43-47 & 57-59). It would have been obvious to one of ordinary skill in the pertinent art, at the time of applicant's invention, to modify the teaching of Rosen to allow the manual selection of device software components by end-user, since doing so will ensure that the end-user has the ultimate control over data transmitted to client machine from other machines/devices connected thereto.

As per claims 2, 8, and 15, they recite limitations which have been addressed in claims 17 and 19 above, therefore, are rejected for the same reasons as cited in claim 17 and 19.

Application/Control Number: 09/970,134

Art Unit: 2192

As per claim 3, *Rosen* as modified by *Slivka et al.* teaches the method of claim 1, wherein said at least one network peripheral device in the step of providing is a network printer having a data storage unit (e.g., Fig.1 *memory 112* & associated text) associated therewith on which the device software is stored (e.g., Fig.1 *printer driver 114* & associated text).

As per claim 4, *Rosen* as modified by *Slivka et al.* teaches the method of claim 3, wherein said data storage unit is a hard disk drive internal to said network printer of the providing step (e.g., par. [0028] line 7-9).

As per claim 5, *Rosen* as modified by *Slivka et al.* teaches the method of claim 3, wherein said mass storage unit is a non-volatile memory internal to said network printer of the providing step (e.g., par. [0028] line 3-5).

As per claim 6, *Rosen* as modified by *Slivka et al.* teaches the method of claim 1, wherein said selected components of the device software in the step of downloading include a device driver compatible with said at least one network peripheral device (e.g., par. [0004] line 4-9).

As per claim 7, *Rosen* as modified by *Slivka et al.* teaches the method of claim 1, wherein said selected components of the device software in the step of downloading include a device driver and utility software associated with said at least one network peripheral device (e.g., par. [0043] line 1-6).

As per claim 9, although *Rosen* as modified by *Slivka et al.* is silent on the network peripheral device being network facsimile machine in particular, though it would have been obvious to one of ordinary skill in the art, at the time of applicant's invention, to include the facsimile machine as one of peripheral devices since facsimile machines, besides printer

Page 8

machines, scanners, etc., were well-known network peripheral devices which depended on associated device drivers to be operable.

As per claim 10, *Rosen* as modified by *Slivka et al.* teaches the method of claim 1, wherein said at least one network peripheral device in the step of providing is a network multifunction machine providing a plurality of capabilities (e.g., par. [0003] line 1-8).

As per claim 11, *Rosen* as modified by *Slivka et al.* teaches the method of claim 1, further comprising the step of installing selected components of the device software on said client machine (e.g., FIG.4B 92 & 94 & associated text, col.2 : 53-55) to facilitate accessing functionality of said at least one network peripheral device (e.g., col.1 : 35-43).

As per claim 12, *Rosen* as modified by *Slivka et al.* teaches the method of claim 11, wherein the step of installing occurs automatically after said end-user of said client machine downloads said selected components of the device software (e.g., col.3 : 22-23).

As per claim 13, *Rosen* as modified by *Slivka et al.* teaches the method of claim 11, wherein said end-user of the client machine manually initiates the step of installing after downloading said selected components of the device software (e.g., col.10 : 1-3 & 8-17).

As per claim 14, *Rosen* as modified by *Slivka et al.* teaches the method of claim 11, wherein said end-user installs said selected components of the device software on said client machine at a time substantially later than the step of downloading (e.g., col.10 : 1-3 & 8-17).

As per claim 15, *Rosen* as modified by *Slivka et al.* teaches the method of claim 1, further comprising the step of uploading the device software to said at least one network peripheral

device by an administrative user for subsequent downloading by said end-user (e.g., FIG.7 & associated text, col.13 : 11-15).

As per claim 18, it recites limitations which have been addressed in claim 1 above, therefore, is rejected for the same reasons as cited in claim 1.

As per claim 20, *Rosen* teaches an apparatus for providing peripheral software from a network, comprising:

- a client machine (e.g., Fig.4 computer 408 & associated text) of an end-user (e.g., par. [0009] line 4-5) disposed on the network (e.g., Fig.4 network 406 & associated text), and operable to obtain a service provided therein; and
- at least one network peripheral disposed on the network for providing said service (e.g., see Abstract, Fig.1 printer driver 114 & memory 112 & associated text, Fig.4 printer 402, 404 & associated text);
- wherein said at least one network peripheral notifies said client machine of the availability of the peripheral software (e.g., FIG.4A 74 & 76, FIG.4B 78, col.1 : 18-20 & 47-52, col.3 : 10-13) in response to said client machine requesting said service of said at least one network peripheral (e.g., par. [0011] line 1-4);

Rosen fails to teach the apparatus wherein one or more components of the device software are manually selected for download by the end-user. Slivka et al. teach a apparatus for providing device software (e.g., col.1 line 31-33) to client machine (e.g., FIG.2 user computer 34 & associated text) from a network (e.g., FIG.2 36, server 46 & associated text) comprising the end-user manually selects for download one or more components of the peripheral software (e.g., FIG.4B 86 & associated text, col.5 : 60-64, col.8 : 56-59). It would have been obvious to one of ordinary skill in the pertinent art, at the time of applicant's invention, to modify the teaching of Rosen to allow the manual selection of device software components by end-user, since doing so will ensure

that the end-user has the ultimate control over data transmitted to client machine from other machines/devices connected thereto.

As per claims 21-26, and 28-34, they recite limitations which have been addressed in claims 2-7, and 10-15, therefore, are rejected for the same reasons as cited in claims 2-7, and 10-15.

As per claim 27, *Rosen* as modified by *Slivka et al.* teaches the apparatus of claim 20, wherein said end-user of said client machine accesses said at least one network peripheral to download the peripheral software via a user interface (e.g., FIG.4B *user update application 78* & 82 & associated text).

Conclusion

10. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chrystine Pham whose telephone number is 571-272-3702. The examiner can normally be reached on Mon-Fri, 8:30am-5pm.

Application/Control Number: 09/970,134 Page 11
